CHILDREN HATE PILLS, CALOMEL AND CASTOR OIL

If Cross, Feverish, Constipated, Give "California Syrup of Figs."

Look back at your childhood days. Remember the "dose" mother insisted on—castor oil, calomel, cathartics. How you hated them, how you fought against taking them.

With our children it's different. Mothers who cling to the old form of physic simply don't realize what they do. The children's revolt is well-founded. Their tender little "innards" are injured by them.

If your child's stomach, liver and bowels need cleansing, give only delicate "California Syrup of Figs." Its action is positive, but gentle. Millions of mothers keep their children "fruit laxative" handy; they know children love to take it; that it never fails to clean the liver and bowels, and sweeten the stomach, and that a teaspoonful given today saves a sick child tomorrow.

Ask your druggist for a fifty-cent bottle of "California Syrup of Figs," which has full directions for babies, children of all ages and for grown-ups plainly on each bottle. Beware of counterfeiters sold here. See that it is made by "California Fig Syrup Company," because any other kind with contempt.—Adv.

HOW SOLDIERS LIVE AND FIGHT IN THE TRENCHES

LONDON, March 5.—When it rains the trenches are half filled with water. The cold is always of the damp, penetrating kind that chills to the very marrow. Hot food is served three times a day to the men in the trenches by other soldiers who scurry like rabbits through long uncovered tunnels running back from the works concealing the guns.

These men in the trenches must have good food in order that they can have good blood, and if they have good blood, they have good courage, they keep warm because their circulation is good and their extremities are warm from exercise. Many men are invalided, however, because their blood and their stomach were not right to withstand the awful hardships of this winter campaign.

When you do not properly digest your food your blood becomes thin and every organ of the body soon feels the effect. Too result is—headaches, sleeplessness, nervousness and many other symptoms—due to accumulation of poisons in the body. Unless the stomach is given aid at this stage—more potent than any other—now is the time to help your weakened stomach—now is the time to take Dr. Pierce's Golden Medical Discovery (in tablet or liquid form.)

It has the same power to set you right as it has been proved to have in thousands of other cases. It will help your stomach so that the food you eat will nourish and sustain you and make good reviving blood. It will enable you to get rid of the waste, to slough liver and irregular bowels have permitted to accumulate in your system.

Dr. Pierce's Golden Medical Discovery is composed of known native healing medicinal roots and herbs with no alcohol nor narcotic drugs to give you harmful habits. It can now be obtained in tablet or liquid form from dealers, or send 50 stamps for box of tablets.

Address: Dr. Pierce, Invalids' Hotel, Buffalo, N. Y.—Adv.

FRIDAY EVENING, MARCH 5, 1915.

CONGRESS AND THE COUNTRY.

The Congress which adjourned this week, after being in session nearly 22 months out of the two years of its life, was successful in winning out its welcome. Its other achievements were hardly more popular.

Its first act was to rush through a tariff bill of extremely radical character, more drastic in its change of policy than President Wilson had led the public to expect, and as subsequent events proved it added American industries instead of providing them with that New Freedom which was to be the revivifying breath of expansion and larger life. The effect upon business was immediate and unmistakable. The European war had a momentarily disturbing effect upon business and commerce, but since that time the country has profited largely by its immense export business due to that war. When the war ceases this country will again have to reckon with its tariff question.

The balance of important Democratic achievement is comprised in legislation of various degrees of ingenuity and ineffectual character for the purpose of raising revenue by direct taxation, the Democratic tariff having conspicuously failed to raise revenue on to promote industry. If there is anything which escaped taxation, it has not been discovered.

The Democratic promise of economical administration has been ignored as completely as the solemn declaration against a Presidential second term. The question uppermost in the Democratic mind, after twenty years of bank debt, was not how to curtail the spoils of political success, but how to enlarge them, and necessarily how to provide the revenue. The Democratic reduction of the tariff will be observed, was disastrous to Democratic political interests as well as to the country at large.

With the end of this Congress comes an end of radical Democratic legislation. The majority in the next House is too small to be dictated to with impunity. The business interests will breathe freer and go forward faster now that this incubus has been removed.

STATE APPROPRIATIONS.

The proposition to make state appropriations to state and other institutions available at the beginning of each quarter, instead of at the ending of the quarter, should by all means be adopted. The present custom puts the cash before the horse. Theoretically, state hospitals and other institutions are expected to run three months on credit, and the custom has been to borrow money on the individual credit of the trustees. This is unjust and unworthy of a great and rich Commonwealth. It argues small faith in the honesty of the management. Furthermore, the accounts of state institutions are audited regularly by a state auditor, and if the expenditures are not according to law the law should be ready to punish the offenders.

A 6 1/2% steel trade is better than a 35% steel business, but with a republican administration maintaining the ship of state the steel trade would be about 95% equality. There will be a final reckoning with the Democratic pilots next year.

Prices have dropped but they haven't gone to smash.

The Uniontown New Freedom Standard seems terribly worried about that few hundred dollars worth of distillery stock, yet it's about the only Democratic symptom we have left.

Uniontown's "coke" center has been discovered.

The beautiful Turk says his inner defenses cannot be broken down, but just the same he has moved his official household across into Asia.

The March lion is here.

The cost of the European war will be a weight around the necks of the coming generations which will make them think more seriously than ever of an international Government Trust.

West Virginia prohibition seems to have exercised a collateral influence as far as Pittsburg.

The German National seems to have slipped in the saddle.

The rumor that Japan will send an army to fight against the Kaiser arouses speculation as to whether it will fight with the Russians or with the French and English. It might be less awkward to have the Japanese fight on the western border.

There was a large flock of lame ducks let loose from the National Capital this week.

Letter merchant coke business is reported to be on the way, but the Uniontown Standard's 45 coke is still a Democratic dream.

The trust-busters never get after any of the big coal companies, probably because there are too many holes in the ground.

The candy uniform is fast disappearing from European fighting circles.

Shippers are finding it had to spot the cost of spotting charges.

The Senatorial criminal who occupied at the gates of the Pen didn't have cold feet, either, judging from the note he gave the sheriff at parting.

An alibi that is easy to establish is sometimes hard to maintain.

The faultfinders of industrial peace are not so grateful as those of bloody war.

Amendment to Charter.
 P. P. Munson Attorneys.

In re amendment in charter of the Conneltsville Traction Co. In the County of Common Pleas of Chester County, Pennsylvania. No. 313, March Term, 1915.

In pursuance to the Act of Assembly of 1913, and the supplementary thereto, notice is hereby given that an application will be made to a Judge of the said Court on Thursday, March 11, 1915, at 10 o'clock A. M., to amend Section 2 of the said Articles of Incorporation, which reads as follows:

The object of the corporation is to build and give assistance to members, when by reason of sickness or disability, they are unable to work, which assistance shall not exceed the sum of \$1,000.00 Dollars per week, to any one

member, also upon the death of a member a funeral benefit to be paid to the family or relative of the deceased member for funeral expenses, shall not be more than One Hundred (\$100.00) Dollars, to read as follows:

"The object of the corporation is to build and give assistance to members, when by reason of sickness or disability, they are unable to work, which assistance shall not exceed the sum of \$1,000.00 Dollars, to read as follows:

"The object of the corporation is to build and give assistance to members, when by reason of sickness or disability, they are unable to work, which assistance shall not exceed the sum of \$1,000.00 Dollars, to read as follows:

Do You Know that Railroad Expansion Makes Work and Stimulates Industry?

Money saved by the railroads flows back to the people. The \$2,000,000 paid annually by the railroads of Pennsylvania and New Jersey to unnecessary trainmen, forced upon them by the Full Crew—or "excess man crew"—Laws, deprives the people of the big benefits and advantages this money, properly expended, would bring.

Because the efficient development of the railway industry in these States is so materially identified with the prosperity of the farmer, business man, working man, and scores of more or less affiliated industries, the railroads ask the people to help them save this huge amount—now absolutely wasted—that it may go to useful purposes and work toward restoration of general prosperity.

This \$2,000,000 spent for 80 locomotives, for example, would make one year's work for 1745 men, as follows:

In the locomotive shops	894
In the various processes of producing the 29,200,000 pounds of material going into these locomotives, 851 men would get employment as follows:	
In steel mills	208
In blast furnaces	45
In iron mines	140
In coal and coke production	60
In other work	400

Wages for all these men would amount to \$1,750,000. This wage money going into circulation would make work in hundreds of other directions.

Railroad development bears upon all industries. It affects hundreds of businesses, thousands of individuals. Under normal conditions, the railroads constitute a great constructive force. Increasing their facilities and improving their systems results in stimulating all industry and business and automatically creates work for innumerable persons in many occupations.

Increased industrial activity swells passenger and freight traffic. This means more trains and real work for additional crews. In turn, it necessitates more locomotives and cars, increased equipment, erection of new and remodeling of old stations, reduction of grades and curves, elimination of grade crossings, construction of sidings in producing territories, increased passenger and freight terminal facilities.

The welfare of the people and the prosperity of the railroads are closely linked. The railroads find their prosperity in the general welfare. They seek not to decrease, but to increase, employment.

Communicate in person, by letter, or otherwise—TODAY—with your elected representatives at Harrisburg and Trenton. Ask them to repeal the Full Crew Laws. Call attention to the fact that, of 282 editorials received to date, 229 urge the repeal of the laws.

Let all get together to start the wheels of industry turning—to open wide the doors to prosperity.

The Dollars We Get and Give

Some one has said that the dollars we get are small but the dollars we spend are always large.

And the lesson seems to be "Get your money's worth."

This means buying with knowledge of goods, markets and prices.

And the great business educator is the advertising in daily newspapers.

And the further lesson is to "Get what you ask for."

When you call for a definite article by name, remember it is your money you are spending.

Don't take a substitute, and shun the storekeeper who habitually offers things "just as good."

SCOTSDALE

SCOTSDALE, March 5.—The annual display of fancy work by ladies of Scottdale and vicinity in the windows of the J. S. Parker Company's store was judged and prizes awarded to the four in the opinion of the three judges having the largest number of points of merit. The prizes were each \$2.50 gold pieces and were won by Mrs. Maud Hulse for crocheted collar, Mrs. William Clark for a linen piano skirt with crocheted trimming, Mrs. A. K. Kiley for a white cover for a baby's crib or go-cart, and Mrs. Mabel Stewart for a pillow embroidered on linen.

To the Housewife

Madam, if your husband is like most men he expects you to look after the health of yourself and children. Coughs and colds are the most common of the minor ailments and are most likely to lead to serious diseases. A child is much more likely to contract diphtheria or scarlet fever when it has a cold. If you will keep the merits of the various remedies that are recommended for coughs and colds, you will find that Chamberlain's Cough Remedy stands high in the estimation of people who use it. It is prompt and effective, pleasant and safe to take, which are qualities especially to be desired when the medicine is intended for children. For sale by all dealers.—Adv.

Appetite Follows Good Digestion

Nearly everyone indulges their appetite and the digestive organs are abused, resulting in a congestion of poisonous waste that clogs the bowels and causes much misery and distress.

The most effective remedy to correct this condition is the combination of simple laxative herbs with papain, known as Dr. Caldwell's Syrup Pepsin. This is a natural, pleasant-tasting remedy, rendering positive action, and quickly relieves indigestion, constipation, sick headache, belching, etc. Drug stores sell Dr. Caldwell's Syrup Pepsin at fifty cents and one dollar a bottle, and in thousands of homes it is the indispensable family remedy. For a free trial bottle write Dr. W. B. Caldwell, 642 Washington St., Monticello, Ills.—Adv.

Keep Your Lungs Strong

This advice is doubly important with
the knowledge that every three minutes
some one in the United States succumbs
to consumption and many refuse to
realize they are afflicted until it is too late.
It is after colds or sickness, from over-
work, confining duties or when general
weakness exists that tubercular germs
thrive because the resistive powers of
the body are weakened.

Only with fresh air, sunshine and
abundant rich blood can one hope to
arrest their progress, and the concen-
trated fact in Scott's Emulsion furnish
fuel for rich blood, and its rare nourish-
ment helps strengthen the lungs while it
builds up the forces.

If you work indoors, tire easily, feel
languid or run-down Scott's Emulsion is
the most strengthening food-medicine
known and is free from alcohol or stupef-
ying drugs. Avoid substitutes.

THE MAN WHO "COULD STOP DRINKING IF HE WANTED TO"

He drank. He didn't attempt to conceal
the fact, but he always insisted that
liquor didn't hurt him and that he could
"cut it out" whenever he wanted to. Finally
one evening, mysteriously, he quit.
He took to much, and caused her great
humiliation.

The next day he decided that he would
"cut out liquor." At breakfast he re-
minded his wife of his decision. That after-
noon was a busy one for him, and yet he
could not concentrate his mind on the
work at hand. He felt unable to get
through the day without a stimulant.

Each abused nerve cell called insistently
for liquor. He realized how serious his
case was, and took immediate steps to
remedy it. In the advice of a friend, he
took the Kelsey Treatment, and in no
longer increased by the craving for alco-
hol. If you are interested and wish in-
formation, address The Kelsey Institute,
420 15th Avenue, Pittsburgh, Pa. Estab-
lished 31 years. (Adv.)
